Finance and Administrative Services	PW#2024-047	Seattle Municipal Tower 44-50 SPU Tenant Improvements	\$14,623,323	Currently Under Review Prior to Advertisement	Nigel Horton 867-0531	This project is located in the Seattle Municipal Tower at 700 5th Avenue in Seattle, and includes tenant improvements to the Seattle Public Utilities Offices on floors 44-50. The work comprises an area of approximately 140,000 sf and includes demolition, structural reinforcement, new partitions, doors and frames, hardware, glazing, built-in casework, finish work, ceilings, mechanical, electrical, sprinkler and fire alarm modifications.		X				X	X			X							
Finance and Administrative Services	PW#2024-066	Haller Lake Electric Vehicle Charging Hub	\$777,390	Q3 2025	Erik Turner 532-1733	This project, located at N 125th St and Stone Ave N in Seattle includes installation of (3) dual corded level 3 direct current fast charger (DCFC) electric vehicle (EV) charging stations, and associated electrical and civil infrastructure to support. Work will take place in an existing parking lot. Minimal paving work is anticipated, limited to patching where conduit and drainage piping is needing to be added. Primary work is electrical to provide routing for SCL main conductors for new service. Scope to include transformer pad for SCL transformer, electrical gear for feeding EV chargers and associated equipment. Significant civil work will be required to trench main SCL power as well as power to EV chargers and ancillary re-routing of existing circuits in the vicinity.								X		X		X					
Finance and Administrative Services	PW#2024-069	Seattle Municipal Tower 28 SCL Tenant Improvement	\$2,977,471	Q3 2025	Jessie McClurg 386-9155	This project, located on floor 28 of the Seattle Municipal Tower,at 700 5th Ave in Seattle involves demolition of existing spaces followed by rebuilding of offices, conference rooms, and break rooms, including all construction, finishes, furniture and equipment.		X				X	X			X		X					
Finance and Administrative Services	PW#2025-020	Seattle Fire Dept. HQ Passenger Elevator Modernization	\$1,300,000	Q3 2025	Alex Parry 561-5797	This project located SFD Headquarters, 301 2nd Ave S in Seattle includes upgrades to the existing passenger elevator equipment, cab and call lights, to bring the unit up to current codes and reduce the frequency of maintenance calls. This project will include: removal of existing elevator cab finishes, mechanical equipment and deteriorated elements within the elevator shaft; installation of new elevator system including but not limited to interior cab finishes, door finishes and call lights on all X levels, roof top equipment, access into the equipment room, electrical room elevator control equipment and HVAC supply; upgrade to miscellaneous doors and hardware to meet current ADA codes on all floors.					X	X			X		X						
Finance and Administrative Services	PW#2025-021	Seattle Justice Center OH Coiling Fire Door Repair	\$381,682	Currently Under Review Prior to Advertisement	Duncan Thieme 425-902-2030	This project is located at Seattle Justice Center, 600 5th Avenue in Seattle. The motors that deploy the overhead coiling fire doors throughout the Seattle Justice Center are nearing the end of their serviceable life and are no longer repairable. This project will replace them with new equipment in an occupied building. The primary goal is to complete the work with minimal impact to the work of the Seattle Police Department and the Seattle Municipal Court. Work will be conducted outside of the primary business hours of the building. For areas that are occupied 24/7, special care will be taken to avoid disruption. As the building is secured, all workers will be subject to security screening, and all materials and tools must be stored in locked rooms when not in use. The work is confined to the following CSI technical specification sections: 02 41 19 – Selective Demolition, for cutting of ceilings to provide access for the work. 05 40 00 – Cold Formed Metal Framing, for miscellaneous infill framing at ceilings. 08 31 16 – Access Panels, for installation of new ceiling access doors to facilitate future maintenance of coiling doors. 08 33 23 – Overhead Coiling Doors, for retrofitting of new controllers and motors. 09 21 00 – Gypsum Board Assemblies, for ceiling repairs at points of access. 09 90 00 – Painting, for final finish of repaired ceilings. 							Flagging, Traffic Control	Demolition, Remediation	Excavation, Grading, Site Work	Trucking	Carpentry	Finishes	Landscaping	Concrete	Concrete - Roadway	Electrical – Facilities	Electrical – Utilities	Mechanical, HVAC, Plumbing	Park Development	Shoring, Dewatering	Channelization, Signage, Wayfinding	Shoreline, Marine Construction
Seattle Department of Transportation	PW#2022-023	Emerson St & Galer Flyover Bridge Painting Projects	\$2,950,000	Q3 2025	Tonnie Roberts 256-5455	The Emerson St Viaduct Extension has been identified for bridge painting. Emerson St Viaduct Extension is a steel I-girder bridge with a cast-in-place concrete deck that is 526-ft bridge located South of the Fisherman’s Terminal and built in 1949. This bridge crosses over BNSF railroad track, Southbound 15th Ave W, 16th Ave W, and the South Ship Canal Trail. Roadway structures has determined that this bridge will receive full lead abatement which will require 100% lead containment during construction. The W Galer Flyover has also been identified for bridge painting. It is a steel I-girder bridge with a cast-in-place concrete deck that is 815-ft bridge and was built in 2002, located in West Queen Anne. Roadway structures determined after site visit to reduce scope from spot painting entire bridge to only spot painting the pedestrian ramp. The pedestrian ramp is located adjacent to W Galer Street and Precision Motorworks.	X	X				X										X
Seattle Department of Transportation	PW#2023-069	2024 Sidewalks & Greenways	\$6,025,675	Q3 2025	Bill Clark 375-4404	Construct new sidewalks on key arterials, walking routes to schools and transit, and new neighborhood greenways (NGW). This project will increase mobility and offer safe, comfortable, accessible, and convenient connections for pedestrians and advance the City’s Bike & Pedestrian Master Plan goals. New sidewalks will be constructed on Greenwood Ave N from N 112th St to N 117th St, N 133rd St to N 134th St, and N 136th St to N 137th St. Seven neighborhood greenways will be constructed across the City at Central Ridge Phase 2 NGW, Beacon Hill Elementary School SRTS NGW, Garfield to Leschi SRTS NGW, Lafayette & Madison Connection SRTS NGW & Stevens Elementary School SRTS NGW. Seattle Public Utilities	PW#2022-029	Tolt Dam Early Warning System Other Project Components	\$1,850,000	Currently Under Review Prior to Advertisement	Josh Campbell 684-5257	The Tolt Early Warning System (TEWS) provides audible and/or visual indications to people downstream of a current or impending breach of the Tolt dam, allowing time for evacuation. The total work for the Tolt Early Warning System upgrade is split between 3 packages – The Siren Replacement project (SRP), the Microwave Work (MW), and the Other Project Components (OPC). This package only covers the OPC project. The existing Tolt Early Warning System (EWS) is upgraded by installing new: 1) System controllers, 2) Remote unit warning systems to include 4 outdoor warning sirens, 1 indoor warning siren, and 9 highway message signs, and 3) A siren alerting data network. The work primarily occurs in the City of Carnation, WA and at the Tolt Watershed which is located east of Carnation. There is also one site in Fall City which is south of Carnation, and one site located in Duvall, WA, which is north of Carnation.	X									X	X				X		X
Seattle Public Utilities	PW#2024-006	Tolt Reservoir Debris Boom Replacement	\$6,260,000	Currently Under Review Prior to Advertisement	Ian Fitz-James 914-9310	This project is located in the Tolt Watershed, approximately 30 miles east of Seattle, approached through a controlled access gate at 12900 NE Kelly Road, Duvall, WA. The existing debris boom spans the South Fork Tolt Reservoir east of the South Fork Tolt Dam. The project consists of the following major elements of work: Demolition of the existing debris boom system in the South Fork Tolt River Reservoir; construction of a single-span debris boom system to completely replace the existing debris boom; construction of two micropile-supported concrete shore anchor blocks for the debris boom system; the construction of permanent access roads to each anchor block assembly; the structural and electrical seismic modifications of the foot bridges which span the dam crest, spillway, and the intake tower; and final landscaping restoration.		X	X	X			X	X	X	X	X			X			X
Seattle Public Utilities	PW#2024-023	Taylor Creek Outfall Improvements	\$700,000	Q3 2025	Katie Wilson 615-1159	This project is located in southeast Seattle near the Taylor Creek ravine at Lakeridge Park. The two existing outfall pipes are located near 1) Rustic Road S; and 2) near Crestwood Drive S. The work includes: Abandon existing storm drainage outfall pipe and replace with a new tightline system consisting of ductile iron pipe and high-density polyethylene (HDPE), ranging from 8 to 18-inches in diameter, including associated storm drainage structures. Additional elements of work include: construction stormwater and erosion control, installation of a diffuser tee and pad at the downstream end of the outfall, vegetation clearing, tree protection, post installation CCTV inspection, and surface and landscape restoration.				X			X	X		X		X					
Seattle Public Utilities	PW#2024-036	Sewer Rehab Pike-Dakota-107th	\$2,250,000	Q3 2025	Samantha Menathy 615-1953	This Project is located at three separate locations in the City of Seattle: 1) E Pike St & 12th Ave; and 2) SW Dakota St & 26th Ave SW and SW Yancy St & 26th Ave SW; and 3) NE 107th St & Lake City Way NE, and consists of the following elements of Work: Replacement of approximately 200 linear feet of sanitary sewer mainline pipe (vitrified clay pipe (VCP) ranging from 8” to 12” in diameter); 500 LF of storm drainage mainline pipe (ductile iron pipe (DIP) ranging from 6” to 12” in diameter); and 200 LF of sanitary side sewer pipe (ranging from 2” – 6” in diameter). Additional elements of work include: traffic control, temporary sewer bypass, abandon existing sewer mainline pipes, assist SPU Water Crew with cut & cap of watermain pipe and temporary water service installation, side sewer reconnections, post installation CCTV inspection, and surface restoration (pavement, stairs, landscaping, and ADA curb ramps).	X			X	X		X	X	X		X						
Seattle Public Utilities	PW#2024-044	Bitter Lake Reservoir Improvements	\$50,000,000	Q3 2025	Andrew Karch 684-4643	The project, located within SPU property at the Bitter Lake Reservoir, Linden Ave. N. and N 143rd St, in Seattle will construct a new 21-million gallon concrete prestressed water reservoir, partially buried and with a roof covering, to replace the existing open air water reservoir location. The scope of work includes civil, landscaping, structural, mechanical, electrical, instrumentation and controls, process and controls, erosion control and tree protection, and traffic control. Seattle Public Utilities	PW#2024-051	Holden Natural Drainage System (NDS)	\$1,097,000	Currently Under Review Prior to Advertisement	Wan-Yee Kuo 684-3957	This project, located at SW Holden St between 16th Ave SW and 18th Ave SW in Seattle, will provide water quality treatment for street runoff by retrofitting the roadsides with bioretention treatment systems. This Project consists of the following elements of Work including but not limited to: construction stormwater erosion control (submittal, implementation, and maintenance of the Construction Stormwater Pollution Prevention plans (CSECP/SWPPP, TVSPP, SP, & TDP)); water main support plan; health and safety plan; clearing and grubbing; demolition and removal of existing surface pavement, sidewalks, and curbs; potholing; excavation; temporary traffic control plan and implementation, including flagging; site preparation and staging; survey; removal and abandoning existing drainage structures and piping; dewatering; temporary stormwater bypass; protection, relocation, and/or adjustments of existing utilities, including water and gas services; reconnection to the existing drainage system; installation of new surface drainage systems, including storm drainage piping, drainage structures, bioretention cells, flow control, pit drains, and modular structural soil cell tree facilitiesTree Box Soil Cells; flow testing; assist SPU crews with water service and meter box relocations/adjustment; television inspections; side sewer reconnections; and final site restoration, including surface paving, pavement markings, sidewalks, curbs, driveway, curb ramps, final planting, and landscape construction	X	X	X	X	X		X	X	X		X	X					X
Seattle Public Utilities	PW#2024-054	Water Main Rehab Package 6 - North	\$5,715,000	Q3 2025	Brian Eng 386-9744	This Project is located at 3 different sites in the City of Seattle and 2 different sites in the City of Shoreline: 1) NW 201st St & 18th Ave NW (Shoreline); 2) 24th Ave NW from NW 196th St to NW 197th St (Shoreline); 3) Woodlawn Ave N from N 63rd St to N 65th St and Meridian Ave N from N 62nd St to Woodlawn Ave N (Seattle); 4) 8th Ave NE from NE 55th St to NE 60th St (Seattle); and 5) Roosevelt Way NE & NE 55th St (Seattle). This Project consists of the following elements of Work: Abandon in-place existing watermain; install new ductile iron watermain pipe, including valving, fire hydrants, and other watermain appurtenances, ranging from 4 inch to 12 inch in diameter by open-trench method; install new 2 inch diameter copper water main pipe via trenchless moling; storm drainage improvements; assist SPU Water Operations with: cut, cap, blocking of existing watermain; temporary and permanent water main connections, and temporary and permanent water services connection transfers; installation of a pressure regulating station including discharge piping to a new air gap vault, and SCADA monitoring system at the NW 201st St site; and final surface restoration of roadway and landscaping, including ADA curb ramp improvements.	X		X	X			X	X	X		X	X					X
Seattle Public Utilities	PW#2024-060	Chief Sealth Trail GSI	\$1,500,000	Currently Under Review Prior to Advertisement	Sierra Gawlowski 507-5223	The project area is within an urban area in Seattle's Othello neighborhood at Kenyon Way S & 39th Ave S. Major work elements include the following: clearing of vacant land, in preparation for the GSI facility and connecting pipes; a flow split maintenance hole (MH) structure to replace an existing MH on the uphill side of the project in Kenyon Way S that is cut into the existing 18" diameter public storm drain (PSD); 12-in diameter storm pipe that will convey flow from the flow split MH to a 21-ft long pre-settling facility located uphill of the GSI facility in Kenyon Way S; 12-in diameter partially overland HDPE pipe to convey flows from the pre-settling facility to the GSI facility; an energy dissipation structure at the inlet to the bioretention facility; stepped bioretention with weir walls and surrounding concrete retaining walls; a new concrete vactor truck access pad with seat wall; concrete staircase with runnel from proposed vactor truck access pad to uphill concrete sidewalk walk; relocation of a pedestrian light pole.	X	X	X	X			X			X	X	X					X
Seattle Public Utilities	PW#2024-062	OCC Men's Hygiene Facilities Remodel	\$500,000	Currently Under Review Prior to Advertisement	Jeremy Nichols 379-4764	Tenant Improvement remodel of an operational field crew men's locker & shower facility at 2700 Airport Way South in Seattle.		X			X	X				X		X					
Seattle Public Utilities	PW#2025-001	SW Barton St Improvements	\$2,088,500	Q3 2025	Bill Clark 375-4404	This project, located at SW Barton St (south half/eastbound lanes) from 29th Ave SW through to just short of RapidRide C Line transit stop in Seattle will excavate, rebuild & repave the eastbound 2 lanes of SW Barton St between 29th Ave SW and 26th Ave SW. The scope includes sidewalk curb/ramp replacement, wastewater utility improvement, pedestrian and street lighting conduit replacement.	X		X	X			X	X		X	X			X		X	
Seattle Public Utilities	PW#2025-008	Soos Reservoir North Tank Recoating	\$485,000	Currently Under Review Prior to Advertisement	Kevin Sahara 684-8094	This project, located at 18015 SE Lake Youngs Road in Renton, WA will remove existing surface coating from tank roof, prepare roof for new coating and apply new coating to roof.		X		X

Purchasing and Contracting
Upcoming Construction Contracts – City Wide Public Works Projects

JOC Work Orders under PW#2024-005A (2024-2025) - Forma Construction Company				
Department	Work Order No.	Project Name	Engineer's Estimate	Project Description
Seattle Public Utilities	WO#2024-128	Lk Youngs Lime Bldg Demo	\$222,635	This project is located at 16205 SE Old Petrovitsky Road in Renton. The Utility treats domestic water departing the Lake Youngs Water reservoir. Adjacent to a pipeline/pump station, one building adds trace amounts of chlorine, a second structure built in the 1980s injected small amounts of lime. This vertical steel tank and mixing equipment has been abandoned for over 20 years. The building is unstable and will be taken down by this contract. Work includes hazardous material removal followed by the demolition of what is primarily steel for recycling, leaving only the slab.
Seattle Public Utilities	WO#2024-129	OCC Meter Shop Canopy Repairs	\$71,804	This project is located at 2700 Airport Way S in Seattle includes removal of a structural metal deck and internal gutter system from two canopies, and installation of its structural replacement with a single-ply membrane roof draining to a new external gutter system. Project includes painting restoration of the existing canopy system
Seattle Center	WO#2024-133	KEXP Pipe Reroute	\$241,900	This project is located at the Seattle Center, 305 Harrison St, Seattle, WA 98109, Northwest Tunnel and Northwest rooms currently occupied by KEXP and The VERA Project. The work will abandon an inaccessible section of heating water piping that had developed a leak assumed to be caused by a failed Vitalic fitting. The route determined to be ideal utilizes the basement storage area of the Northwest rooms below the breezeway between the spaces occupied by KEXP and VERA. To minimize future cost impacts and allow for the future removal of the breezeway canopy, the chilled water piping will also be rerouted.
Seattle Public Utilities	WO#2024-134	Landsburg Fish Ladder Pond 2 Crowder Rail Replacement	\$192,380	This project, located at the Landsburg Fish Passage Facility at 28700 SE 252nd Pl in Ravensdale, WA, will replace fish crowder rail track system within Pond 2.
Seattle Public Utilities	WO#2024-135	Landsburg Fish Ladder Pond Concrete Repairs	\$442,348	This project, located at the Landsburg Fish Passage Facility at 28700 SE 252nd Pl in Ravensdale, WA, will repair existing concrete spalls and delamination within pond 1 and pond 2..
Seattle Public Utilities	WO#2025-101	Longfellow NDS - Kenyon Site Completion	\$350,000	This project, located at the intersection of SW Kenyon St and 24th Ave SW will complete installation of drainage and landscaping improvements at the project location associated with the Longfellow NDS project. Work includes installation of drainage structures, a bioretention cell (BRC), plant installation and hardscape restoration.
Parks and Recreation	WO#2025-102	South Leschi Marina Upland Utility Installation	\$437,000	This project, located at the South Leschi Marina, 100 Lakeside Ave in Seattle, will install supporting utility infrastructure for electrical, ater and sewage in advance of the construction of the waterside wave attenuator and public access facility by others. This project will not provide final hook-up of utiities.
Seattle Public Utilities	WO#2025-105	Volunteer Park Gate House Stair Replacement	\$84,013	This project, located at 1400 East Prospect Street in Seattle. The Volunteer Park Reservoir water discharges through a sluice control valve located in the basement of the reservoir gate house. Access to this valve is at the base of a 1920s vintage staircase. The steel stair assembly has significant structural deterioration from a century in this damp environment. Project will remove and replace this damaged staircase in conformance with modern building codes.
Parks and Recreation	WO#2025-106	Stan S. Sayres Memorial Park Boat Ramp Renovation	\$413,900	This project, located at 3808 Lake Washington Blvd. S in Seattle will replace failed surfacing at the North section of the boat ramp with precast concrete panels and cast-in-place concrete.

City of Seattle
Purchasing and Contracting
Upcoming Construction Contracts – City Wide Public Works Projects

Finance and Administrative Services	WO#2025-107	SPU Haller Lake Trailer Three	\$258,628	This project, located at 12600 Stone Ave North in Seattle will remove and dispose of existing T3 Trailer, conduct site improvements for the new replacement trailer, make all trailer connections, build replacement ramp and walkway on west side with integrated canopy
Finance and Administrative Services	WO#2025-108	EOC Accessibility Improvements	\$224,021	This project, located at 105 fth Ave N in Seattle, will provide accessible improvements to eight restrooms, kitchen cabinetry, hallway and entry doors, wall mounted equipment and switches, and exterior accessible entry walkway. The work on the interior and exterior is on the Emergency Operations Center side of the building only.
Seattle Public Utilities	WO#2025-109	NTS Roll-Up Door - Tipping Floor	\$180,000	This project, located at 1350 N 34th St in Seattle, will remove an existing overhead-coiling door and replace with a new overhead coiling door at the North Transfer Station (NTS) Tipping Floor building
Seattle Public Utilities	WO#2025-110	NTS Overhead Door Replacement – Recycling Building	\$320,000	This project, located at 1350 N 34th St in Seattle, will remove existing overhead-coiling doors and replace them with 2 new overhead coiling doors at the North Transfer Station (NTS) Recycling area
Seattle Public Utilities	WO#2025-111	Magnolia Courtyard Soil and Concrete Removal	\$127,905	This project, located at 3120 W. Grover St in Seattle will remove and dispose of contaminated soil and concrete within a defined area and depth per the Engineer’s documents. Alternate scope is to remove contaminated soil only and leave concrete in place.
Seattle Center	WO#2025-112	Seattle Center EV Charging Project	\$311,995	This project, located at the Seattle Center Campus, 308 Nob Hill Ave N in Seattle and 5th Avenue Garage, 516 Harrison St in Seattle will install (32) Level 2 EV charging stations on Campus and in the 5th Avenue Parking Garage for employee/fleet and public use
