This project rehabilitates the Chief Seattle fireboat with upgraded systems, engines, pumps, and other equipment. Following the upgrade, the Chief Seattle is anticipated to be able to pump up to 10,000 gallons of water per minute and have the ability to reach an average top speed of 16 to 20 knots. The Chief Seattle will be relocated to freshwater, replacing the Alki fireboat. Operations and maintenance costs are to be funded by the Seattle Fire Department and are not expected to increase because of this project.

## Computer Center Independent Cooling

**BCL/Program Name:** General Government Facilities - General

**BCL/Program Code:** A1GM1

**Project Type:** New Investment

**Start Date:** 1st Quarter 2007

**Project ID:** A1GM107

**End Date:** 4th Quarter 2008

**Location:** 700 5th Ave

**Neighborhood Plan:** Not in a Neighborhood Plan

**Neighborhood Plan Matrix:** N/A

**Neighborhood District:** Downtown

**Urban Village:** Commercial Core

This project constructs an independent cooling system for the City's computer centers located in the Seattle Municipal Tower (SMT) and provides for related improvements. The SMT houses many of the City's critical computing operations, including the computers that run the financial system and the public safety data delivered to police cars. To eliminate conflicts in scheduled maintenance and operations needs, and to reduce the vulnerability of the City's computing resources, the new system will be independent of SMT's hydronic system, and will have redundant components so maintenance can be performed during normal operations.

This ongoing project provides for pass-through budget authority to perform customer-requested tenant improvement work within facilities that FFD owns and/or manages. FFD has exclusive responsibility to manage all tenant improvement work within Department-owned/managed facilities. This work involves in-house FFD project management staff, architecture/engineering and other consultant services, public works construction contracts, and furniture/equipment procurement. All contracts are held and paid by FFD with reimbursement from the customer department.

This project includes three main components, and other work as needed. First, hardened hydrants are installed at several reservoirs and water storage tanks. These hardened hydrants provide easier access to water supplies and allow water to be drawn from a reservoir without contamination. Second, hand suction hose and strainer buckets are procured for each fire engine to allow them to siphon water for fire fighting from any water body. Third, large diameter hose is stockpiled in geographically-strategic areas and is increased from three and a half inches to about six inches. These actions increase firefighters' range when using water from reservoirs, lakes, or saltwater. Operations and maintenance costs are paid by the Seattle Fire Department and Seattle Public Utilities through a memorandum of agreement.

This project relocates the Emergency Operations Center (EOC) from Fire Station 02 to a new facility co-located with the new Fire Station 10 project (A1FL110) and Fire Alarm Center project (A1FL201). The funding for this project includes, but is not limited to, land acquisition for the project's share of the overall site costs. Project elements include an operations area and 24-hour duty room, media briefing room, director and staff offices, communications center, and a secure reception area. Operations and maintenance costs are incorporated into future Seattle Police Department budgets.

This project will fund a pre-design study for replacing the current Fire Headquarters and Fire Marshall's offices. Both offices are now in seismically vulnerable buildings in the liquefaction zone in Pioneer Square. The study will consider both constructing office space for these functions at the site of the new Fire Station 10 and leasing space in another building. Co-locating these offices will improve the effective direction and operation of fire department services.

This project cleans up diesel fuel contaminating the soil under Fire Station 02 from a leaking fuel tank removed in the late 1990s. When the tank was removed, it was not possible to remove all contaminated soil because of the proximity of the shallow foundations of the fire station. Cleanup work will proceed in two primary phases. First, a vapor and groundwater extraction system will remove free diesel and contaminated groundwater from the soil. The equipment is expected to operate for five years. In the second phase, naturally occurring microbes in the soil will remove remaining contamination that remains stuck to soil particles. The second phase includes, but is not limited to, monitoring the progress of soil microbes in achieving cleanup goals.

This project is a major renovation and expansion of Fire Station 02 to address current structural and systems inadequacies. After the City's Emergency Operations Center (see project A1FL301) and Fire Alarm Center (see project A1FL201) move to a new Fire Station 10, a wellness and fitness center serving the Fire Department is constructed in the vacated space. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project rebuilds Fire Station 06 at a new location in the Central District. The City's final siting decision addresses operational and response requirements. The existing structure is to be nominated for historic landmark designation to protect its historic character and will no longer serve as a fire station. The City intends to convey this property at full market price and requires the resulting proceeds to fund other planned fire facilities. The new Fire Station 06 houses the same functions as the existing facility and provides the full complement of services typical of a station of its size. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project builds a new, relocated Fire Station 10. The new station houses essentially the same functions as the existing facility, potentially including a headquarters function and Fire Marshal's Office. The existing reserve hazmat unit is slated to move to Fire Station 31. The new Fire Station 10 is co-located with a new Fire Alarm Center (project A1FL201) and a new Emergency Operations Center (project A1FL301). The project includes shoring the south wall of the Yesler Way Viaduct and installing a foundation sufficient for a future building on the north end of the project site.

**Urban Village:** Not in an Urban Village

This project provides for a major renovation and expansion for Fire Station 14. A seismic retrofit, expansion of crew space and equipment storage, a reconfiguration of the apparatus bays to increase available space and functionality, and other improvements are included in the project. Two existing bays are remodeled to accommodate current apparatus and keep the units out of the weather. Fire Station 14 will assume the duties of lead station for Battalion V, covering much of south Seattle east of the Duwamish River.

This project expands and remodels Fire Station 17 while largely preserving its potentially-historic character. This expansion permits Station 17 to assume responsibility as the lead station for Battalion VI, covering Seattle's northeast sector, the Eastlake neighborhood, and a portion of Capitol Hill. Following the expansion, Fire Station 17 has room to house the battalion chief's office and to support the battalion's training activities. The expansion also creates greater capacity for the existing engine and ladder truck. The existing apparatus bay temporarily houses a medic unit moved from Fire Station 16. Operating costs for the Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project builds a new Fire Station 20 at a new location in the West Queen Anne/Interbay area, given that renovation of this small and obsolete station is not cost-effective. The City's siting decision will primarily address operational and response requirements. The rebuilt station meets all current seismic safety codes and provides the full complement of services typical of a station housing one engine and one reserve unit. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project rebuilds Fire Station 22 in the same location on an expanded site. Fire Station 22 is 40 years old and is inadequately sized for current fire operations. Although the existing site has limited parking, it is large enough to accommodate an upgraded facility within minimal additional land. Following the station's rebuild, it continues to house the E22 engine company and the Department's Incident Command Unit. While the station is under construction, an interim facility is sited within the neighborhood to provide continuity of fire and medic service until the station project is complete. The final siting configuration and/or location is dependent upon the 520 bridge replacement project and final alignment. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project provides a seismic and safety upgrade for Fire Station 25 to meet current codes and makes minor functional improvements to the facility. A change in station operations moves Fire Station 25's existing battalion chief unit and reserve battalion chief unit to Fire Station 02. Despite this move, Fire Station 25 remains the lead station for Battalion II. The transfer is planned because Fire Station 02 offers ample room for multiple apparatus bays and would permit Fire Station 25 the capacity to house another medic unit if future demand warrants the service expansion. While the station is being upgraded, an interim facility is sited within the neighborhood to provide continuity of fire and medic service until the station project is complete.

## Fire Station 28

**BCL/Program Name:** Neighborhood Fire Stations

**BCL/Program Code:** A1FL1

**Project Type:** Improved Facility

**Start Date:** 3rd Quarter 2006

**Project ID:** A1FL128

**End Date:** 4th Quarter 2009

**Location:** 5968 Rainier Ave. S

**Neighborhood Plan:** Not in a Neighborhood Plan

**Neighborhood Plan Matrix:** N/A

**Neighborhood District:** Southeast

**Urban Village:** Not in an Urban Village

This project constructs a new Fire Station 28 to accommodate modern equipment, apparatus and crew support functions that do not fit within the existing fire station. The new fire station will continue to house engine, ladder, and medic units, and will meet all modern construction codes, including “essential facility” seismic standards. Design and construction will proceed on the existing fire station site in a manner that allows continued operation of the existing station during construction. This project also includes the construction of a new 5,400-square-foot building at the rear of the site to accommodate the Fire Department’s Metropolitan Medical Response System, and Urban Search and Rescue units. Operating costs for the Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project rebuilds Fire Station 30 at its existing location. The building's square footage is approximately doubled due to a small expansion of the building's footprint and its expected design as a two-story building. The complete station continues to house one engine company and a reserve engine. It also meets all current seismic safety codes and provides the full complement of services typical of a station of its size. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project provides a seismic and safety upgrade for Fire Station 31 to meet current codes and make minor functional improvements to the facility. At the conclusion of the project, Fire Station 31 houses a hazmat reserve unit intended to serve the north end of Seattle that is transferred from Fire Station 10. The station continues to house an engine, ladder, medic unit, and trailer-mounted generator. While the station is being upgraded, an interim facility is sited within the neighborhood to provide continuity of fire and medic service until the station project is complete.

This project rebuilds Fire Station 32 on its existing site. As part of the rebuild, Fire Station 32 is slated for major improvements and conversion to the lead station for Battalion VII, which covers all of West Seattle, Southwest Seattle, Harbor Island, and the industrial areas lining both sides of the Duwamish River. Following the rebuild, Fire Station 32 continues to house the same functions as the existing facility. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

The existing structure is to be nominated for historic landmark designation to protect its historic character and it will no longer serve as a fire station. The City intends to convey excess property not necessary for the redevelopment of the fire station at full market price and requires the resulting proceeds to fund other planned fire facilities. The rebuilt station meets all current seismic safety codes and provides the full complement of services typical of a station housing one engine and a reserve. This project provides a seismic and safety upgrade for Fire Station 40 to meet current codes and makes minor functional improvements to the facility. Fire Station 40 continues to house two apparatus. While the station is being upgraded, an interim facility is sited within the neighborhood to provide continuity of fire and medic service until the station project is complete.

This project provides a major renovation and expansion of Fire Station 41. It addresses current structural and systems inadequacies, slightly expands the existing structure to create additional space for decontamination equipment, crew preparation and vehicle maintenance functions, replaces certain crew areas displaced by these support functions, and provides for other improvements as needed. Operating costs for Fire Department and Fleets and Facilities Department are anticipated to increase due to the larger size of the fire station.

This project upgrades the drainage systems at fire stations to comply with the Stormwater, Grading, and Drainage Control Code (SMC 22.800). The upgraded systems divert the wastewater resulting from washing fire apparatus from the drainage system to the sewer system or to vegetated filtration swales. Financing assumptions shown in the table below reflect a successful application to Seattle Public Utilities (SPU) for a grant for design, construction, and monitoring costs. Until upgrade work is completed, the Fire Department has modified washing procedures to minimize impact on receiving waters.

This project installs emergency generators at six fire stations: Fire Station 8 (Queen Anne), Fire Station 11 (Highland Park), Fire Station 24 (Bitter Lake), Fire Station 34 (Madison Park), Fire Station 36 (Delridge), and Fire Station 40 (Wedgewood). These fire stations do not have emergency generators, and funding to provide emergency generators was not included in the Fire Facilities and Emergency Response Levy. This project installs generators in advance of the seismic retrofit projects, where feasible, in order to increase disaster preparedness in a timely manner.

Annual inflation in construction costs has been substantially higher than anticipated when the Fire Facilities and Emergency Response Levy was planned in 2002. Expected construction costs have also risen because of estimating errors, the cost of building and renovating fire stations to a LEED Silver standard, and more stringent building codes. In the January 2006 Neighborhood Fire Station Financial Update, the Mayor proposed increasing neighborhood fire station budgets to pay for \$67 million of these unanticipated costs. This budget proposes funding the \$67 million with about \$5 million each year in Real Estate Excise Tax (REET) revenues, as well as bond issues in 2008 (\$22.9 million) and 2010 (\$10.4 million).

This CIP project budgets the REET revenues necessary to pay debt service on the 2008 and 2010 bonds. Debt service will be amortized over the construction period of the Levy.

This project funds land purchases for the neighborhood fire station projects included in the Fire Facilities and Emergency Response Levy program. The new properties house rebuilt stations that are expected to move from their existing sites or will be built on expanded present sites. These stations are located in the Chinatown/International District (Fire Station 10), Central District (Fire Station 06), West Queen Anne/Interbay (Fire Station 20), High Point (Fire Station 37), and Ravenna/Bryant (Fire Station 38). Budgets include relocation expenses for current owners and tenants. The land acquisition for Fire Station 22 in Roanoke may be delayed due to the SR 520 bridge replacement project and alignment impacts to the existing Fire Station 22. This delay is not reflected within the spending plan below.

This project replaces hydraulic vehicle lifts at the Charles Street Vehicle Maintenance Facility that have reached the end of their useful lives and are leaking. New lifts will meet current American National Standards Institute (ANSI) safety standards and accommodate the larger and heavier vehicles now in the City's vehicle fleet. Lifts are required to continue maintenance and repair of City vehicles.

This project provides an annual contribution (including increases for inflation) to a capital renewal fund for the Garden of Remembrance, located next to Benaroya Hall, per an agreement with Benaroya Hall Music Center (BHMC), a private, non-profit affiliate of the Seattle Symphony. This fund pays for major maintenance and replaces garden installations, including but not limited to irrigation equipment, landscaping, electrical/lighting fixtures, and mechanical water features. The project is managed by the BHMC and is displayed within FFD's CIP for informational purposes only.

Materials staged at the Haller Lake facility by SDOT, SPU and City Light range from land clearing debris and reclaimed paving to structural fill and chip seal. Stormwater Management Code requires that runoff from materials piles be managed in order to prevent turbidity and other pollution problems in downstream waters. This project provides for the erection of canopies over the materials piles, and other related improvements, in order to prevent storm water from percolating through the material and washing sediment and or toxins into the storm sewer system. FFD is covering a portion of the piles in a demonstration project partly funded by an SPU grant. This funding will pay for covers for the balance of the site not included in the pilot project with SPU.

This project provides a facility for specialized and legally-required training for employees of the Fire Department, Seattle Public Utilities, and the Seattle Department of Transportation. Much of the training equipment that is provided at this new facility is cross functional; all three departments, for example, require training for tunnel extractions and elevated tower operations, including rescues. Funds for land acquisition are excluded from the amounts below, as final costs for acquisition and related financing expense are not yet known, pending sale of excess property. Costs for operation of the facility will be shared by the departments using the facility.

This project provides for the preservation of City-owned leased facilities. FFD estimates that a baseline funding of \$200,000 dollars per year, escalated over time for inflation, is required for spot repairs to preserve and prolong the useful life of these facilities. In 2007 and 2008, the budget includes additional funding for projects including, but not limited to, the replacement of the heating and ventilation systems at community facilities. A 2007 Supplemental Budget appropriation of \$500,000 will provide for additional investments at City-owned senior centers. In 2007 and 2008, FFD is reviewing potential additional projects at the senior centers, and prioritizing them based on the current condition of life safety, building envelope, and mechanical systems.

This project funds the development of storm water management plans for FFD-owned facilities in compliance with National Pollution Discharge Elimination System (NPDES) regulations in order to improve storm water quality. In facilities FFD leases out, staff will work with tenants to ensure compliance with NPDES requirements.

Modest increases in operations costs for FFD or FFD tenants are expected in order to comply with the new NPDES requirements.
