

Agenda

- 1. Sub-program data review
- 2. Oversight Committee Work Group Discussion
- 3. Next steps

Levy Assessment

8 of 31 sub-programs assessed as needing further review or adjustment

SAFE ROUTES TO SCHOOL

Vision Zero

- Complete 12 –15 corridor safety projects on our highest-crash streets
- √ Complete Safe Routes to School projects at every public school (approx. 100 schools)
- Increase crosswalk repainting frequency to a four-year or better cycle to ensure every crosswalk is clearly marked. Each crosswalk location repainted and/or replaced.
- Maintain and improve the City's system of traffic signals, signs, and markings

Pedestrians and Bicyclists

- Construct approx. 50 miles of PBLs & approx. 60 miles of greenways
- Repair up to 225 blocks of damaged sidewalks in our urban centers and villages
- Make curb ramp and crossing improvements at up to 750 intersections citywide

Neighborhood Projects

 Complete 20-35 neighborhood priority projects to improve safety, mobility and access and quality of life in those neighborhoods

LEGEND

Sub-program needs further review and adjustment

Sub-program delivery on track

MAINTENANCE AND REPAIR

Maintain Streets

- Repave up to 180 lane-miles of arterial streets
- Repave 65 targeted locations every year, totaling about 70 lane-miles of arterial streets

Bridges and Structures

- Eliminate the backlog of needed bridge spot repairs
- ✓ Seismically reinforce 16 vulnerable bridges
- √ Replace Seattle's last timber vehicle bridge on Fairview Avenue
- Plan and design high priority bridge replacements to begin construction after 2024
- Other bridge safety investments, including pedestrian/bicycle improvements, and stairway and structure repair and rehabilitation

Urban Forest and Drainage

- Tree Trimming: Add a new tree crew focused on quick response to critical pruning needs (such as clearances for people biking and walking, and at transit stops) and on ensuring clear sightlines to traffic signals and signs
- Tree Planting: Replace every tree removed due to disease or safety with two new trees
- Drainage Partnership: Partner with Seattle Public Utilities to pave streets, provide new pedestrian infrastructure and crossings, and address drainage issues in flood-prone South Park neighborhood

CONGESTION RELIEF

Corridor Mobility

- Multimodal Improvements: Complete 7 transit plus multimodal corridor projects, redesigning major streets with more frequent and reliable buses, upgraded paving, signals and other improvements to improve connectivity and safety for all travelers, whether walking, biking, driving, or taking transit; complete the Burke Gilman Trail Missing Link, Fauntleroy Way Southwest Boulevard projects, develop plans and complete improvements to enhance the NE 45th St Corridor for pedestrians and cyclists between 4th Ave NE and Brooklyn Ave NE by the time University Light Rail opens in 2021, and plan corridor improvements for Aurora Ave N
- Traffic Signal Timing Improvements: Optimize traffic signal timing on 5 corridors throughout the city each year to improve traffic flow and serve people in cars and trucks, on bicycles, transit, and foot
- Intelligent Transportation System
 Improvements: Implement Next Generation ITS
 Improvements to help all travelers move more
 reliably around the city and provide improved
 information for travelers
- Transit Corridor Improvements: Make bus service more reliable through a comprehensive transit improvement program to eliminate bottlenecks in key locations and contribute to the transit improvements on 7 transit plus corridors including planning for access and egress improvements to the West Seattle peninsula

CONGESTION RELIEF

Light Rail Partnership

- Light Rail Connections: Provide City funding contribution for a new Link Light rail station at Graham Street in southeast Seattle
- Northgate Bridge: Finalize design on this project that will improve connections over I-5 for pedestrians and bicyclists to the future light rail station at Northgate
- Light Rail Connections: Implement early portions of the accessible Mt. Baker project

Pedestrian and Bicycle Improvements

- New Sidewalks: Build 150 new blocks of sidewalks, filling in more than 75% of the sidewalk gaps on priority transit corridors citywide with an emphasis on creating accessible routes for those with disabilities and for the elderly
- Bicycle and Walking Facilities: Make residential streets without sidewalks safer and more comfortable for walking, including through partnership with Seattle Public Utilities in the flood-prone Broadview neighborhood
- Bicycle and Walking Facilities: Install 1,500 new bicycle parking spots citywide and maintain existing bike facilities. Install other biking and walking investments.

Freight Mobility Improvements

- Partnership Improvements: Provide local money to design and build the Lander Street Overpass
- Heavy Haul Network: Build the East Marginal Way corridor, a key route in Seattle's Heavy Haul Network
- Spot Improvements: Fund a targeted spot improvement program to help freight movement

Sub-programs under review

- New Sidewalks
- Transit-Plus Multimodal Corridors
- Bicycle Master Plan
- Sidewalk Safety Repair
- Curb Ramps & Crossings

Levy Oversight Committee focus areas:

- Arterial Major Maintenance
- Arterial Asphalt & Concrete
- Bridge Replacement Planning & Design

Arterial Major Maintenance (AMM) Sub-Program

Levy Commitment	Findings	Key Data
Repave 65 targeted locations every year, totaling about 70 lane-miles of arterial street, with a repair and maintenance program run by city crews.	The cost to complete this levy commitment is greater than originally anticipated. This increase reflects rising construction costs due to local market conditions and added scope for replacing curb ramps. As this work is primarily done on a "spot repair" basis, a majority of this subprogram budget needs to be allocated towards spot repairs. On average, SDOT completes approximately 38-65 spot repairs per year.	 SDOT has \$40M to deliver the AMM subprogram. Current estimates show that after spending \$11M in the first two years of the levy, SDOT has \$29M of remaining funding. To deliver the original levy commitment, SDOT would need an additional \$18M - \$33M depending on level of concrete paving required. SDOT will work with the Levy Oversight Committee to determine how this deliverable should be adjusted while staying within available funding. Additionally, SDOT will implement strategies to reduce the cost for this sub-program.

Arterial Major Maintenance (AMM) Sub-Program

Findings

SDOT cannot meet the original levy commitment in this sub-program because:

- Funds from this sub-program are being used to build curb ramps as part of the consent decree,
 which the original funding plan did not assume
- Rising construction costs due to local market conditions

Recommendations

- Establish a new estimate for how many lane miles of arterial streets can be delivered given available funds, including annual benchmark goals, by August 2018
- Count the number of curb ramps delivered using this sub-program

Arterial Asphalt & Concrete (AAC) Sub-Program

Levy Commitment	Findings	Key Data
Repave up to 180 lane-miles of arterial streets.	While not a formal levy commitment, SDOT published a preliminary list of paving projects during the levy outreach period in 2015. SDOT is confident that we can still meet the original levy commitment to repave up to 180 lane-miles of arterial streets within available funding but will need to revise the original project list to better reflect priorities based on pavement conditions and travel volumes. The original budget also assumed a level of leverage which is no longer considered feasible.	 SDOT has \$253M - \$254M to deliver the AAC sub-program. Current estimates show that after spending \$37M in the first two years of the levy, SDOT has \$216M - \$217M of remaining funding. While the budget is lower than originally anticipated, SDOT can deliver 180 lane-miles of paving projects with available funding including the projects that have already been completed.

Arterial Asphalt & Concrete (AAC) Sub-Program

Findings

There are significant risks facing SDOT's ability to deliver the original levy commitment in this sub-program because:

- SDOT anticipated delivering portions of the 180-mile original levy commitment using leveraged funds from the transit plus multimodal corridor sub-program. Because these funds are at extreme risk, it may jeopardize SDOT's ability to meet the original 180-mile commitment.
- The original AAC paving project list that SDOT published during the levy outreach period in 2015 (while not a formal Levy commitment) must be updated to reflect new conditions
- The original funding plan for this sub-program identified \$19M in leveraged funds. SDOT now anticipates only \$8M in leverage funds. Levy and local sources are also less than originally anticipated in this sub-program, resulting in an updated funding plan with \$15M less than the original funding plan across levy, local, and leverage sources.

Recommendations

- Develop and publish an updated paving list with a detailed explanation of any changes, with a focus on those now being covered by AAC funds, including annual benchmark goals, by August 2018
- Identify near-term pavement repairs for corridors from the original list that are deferred given new conditions

Bridge Replacement (Planning & Design) Sub-Program

Levy Commitment Key data Findings Plan and design high-priority bridge While not a formal levy commitment, SDOT SDOT has \$15M to deliver the Bridge replacements to begin construction published a preliminary list of bridge Replacement Planning & Design subafter 2024. Of the funds identified replacement projects during the levy program. outreach period in 2015. While SDOT does in this element, up to \$10 million of With this funding, SDOT will prioritize total funding (local, levy, leverage) plan to meet the levy commitment, cost available funding to meet the levy may be used for implementing estimates for planning and design work are commitment by advancing planning near-term pedestrian and bicycle greater than originally anticipated and the and design for bridges that are most original project list needs to be revised to safety projects on bridges being vulnerable and in need of replacement studied for replacement (in better reflect the city's top priorities. addition to funding provided for pedestrian and bicycle safety The original budget assumed leverage projects in other elements). opportunities which are not available.

Bridge Replacement (Planning & Design) Sub-Program

Findings

SDOT cannot meet the original levy commitment in this sub-program because:

- The original funding plan for this sub-program was \$34M. The updated funding plan is only \$15M, reflecting leverage opportunities that are no longer assumed.
- The preliminary list of bridges that SDOT published during the levy outreach period in 2015 (while not a formal levy commitment) must be updated to reflect new conditions

Recommendations

- Develop and publish an updated list of bridges to be planned and designed with a detailed explanation for any changes by August 2018
- Allocate \$5M to complete near-term bicycle and pedestrian safety projects as highlighted in the February 2018 Bridge Safety Analysis Report (the original levy committed "up to \$10M of total funding (local, levy, leverage)" from this sub-program for these types of projects)

What We Heard

- June: Continue to share data with Levy Oversight Committee (LOC) and modal boards. LOC and modal boards begin to refine recommendations
- July: Modal boards finalize recommendations
- August 2: LOC finalizes all sub-program recommendations
- Mid-late August: SDOT releases draft recommendations to public
- August 23: LOC meeting
- September: Public outreach/council process
- October: SDOT finalizes recommendations
