

2023 Second Quarter

Surveillance Technology Determination Report

Seattle Information Technology

Summary

The Privacy Office received 68 total requests for privacy reviews during Q2 of 2023. 68 technologies and projects were applicable for this report. 2 of the technologies reviewed during Q2 of 2023 were determined to be surveillance technology.

About This Report

The Seattle City Council passed [SMC 14.18](#) ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between April 1, 2023 and June 30, 2023. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
ARTS	Office of Arts and Culture
AUD	Office of the City Auditor
CBO	City Budgets Office
CEN	Seattle Center
CIV	Civil Service Commission
CPC	Community Police Commission
CSCC	Community Safety and Communications Center
DEEL	Department of Education and Early Learning
DON	Department of Neighborhoods
SDOT	Seattle Department of Transportation
EEC	Ethics and Elections
FAS	Finance and Administrative Services
HSD	Human Service Department
HXM	Office of Hearing Examiner
OIRA	Office of Immigrant and Refugee Affairs
ITD	Information Technology Department
LAW	Law Department
LEG	Legislative Department
MOS	Mayor's Office
OCR	Office of Civil Rights
OED	Office of Economic Development
OH	Office of Housing
OIG	Office of the Inspector General
OIR	Office of Intergovernmental Relations
OLS	Office of Labor Standards

OSE	Office of Sustainability and Environment
OPCD	Office of Planning & Community Development
PKS	Seattle Parks and Recreation
PPN	Police Pension
RET	Seattle City Employees' Retirement
SDCI	Seattle Department of Construction & Inspections
SCL	Seattle City Light
SFD	Seattle Fire Department
SDHR	Seattle Department of Human Resources
SMC	Seattle Municipal Court
SPD	Seattle Police Department
SPL	Seattle Public Library
SPU	Seattle Public Utilities

Surveillance Technologies

Please note: 1 of the below technologies are covered by existing SIRS approved by council. 1 is a net new technology that will go through SIR process.

Department	Case No.	Reviewed Item
SPD	4582	ICOR Tech Mini Robot

Description

The ICOR Mini-123 is a lightweight, portable robot operated by a single SPD from a handheld control unit from a safe position nearby. Designed for rapid tactical missions, the robot is simple to operate and quick to deploy for searching rooms, hallways, stairwells and confined spaces. With rubber tracks and articulating front and rear flippers, the Mini-123 effortlessly climbs stairs. It also includes an extendible rotating claw arm, camera, and 2-way communication.

The functionality of this ROV is included in the Council approved Remotely Operated Vehicles (ROVs) SIR.

There is no legal standard or condition for the use of these cameras in non-protected public areas, such as a hotel hallway or public waterway. However, if the use of the camera is to occur inside a protected area, such as in a person's home or property, absent exigent circumstances, or consent, a signed warrant is obtained from a judge.

Department	Case No.	Reviewed Item
SPD	4492	StarChase

Inclusion criteria

- The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Description

The StarChase system is a police pursuit management technology that contains a miniature GPS tag and compressed-air launcher which can be a handheld unit or mounted into a police vehicle.

The GPS tracker attaches to vehicles and allows tracking of vehicle location while limiting the need to pursue. GPS coordinates of the fleeing vehicle are relayed through wireless phone networks and displays location, suspect speed, and other pertinent data are viewed via the secure web-based interface.

All of the tracking data can be downloaded from the web portal and used as evidence in a court of law.

The projectile conforms to NIJ less-than-lethal standards.

Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix.

Surveillance Technology Criteria Review

4/3/2023

Technology Description

Technology Name	Slidequest infographics subscription		
Description	Slidequest aids in enhancing presentations and reports with infographics.		
Department	ITD	Case No.	4409

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/3/2023

Technology Description

Technology Name	Maxicom IQ4		
Description	Upgrade to existing SPR Maxicom irrigation system. This is now a SaaS solution. It has a web/mobile interface, and communicates with physical controllers at parks using a secured T-Mobile Cellular Data service.		
Department	PKS	Case No.	4405

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/3/2023

Technology Description

Technology Name	Virtual Teleprompter Pro		
Description	<p>Teleprompter app used to provide wording for videos. CPC will be using it for prompting in recorded public videos (think script.)</p> <p>Description: The Virtual Teleprompter app is an elegant teleprompter that runs on your laptop. The Virtual Teleprompter app is an ideal companion for online meetings, interviews, presentation, live streaming, content creators or making pre-recorded content.</p>		
Department	CPC	Case No.	4424

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/4/2023

Technology Description

Technology Name	Camero-XAVER100: Through Wall Radar System		
Description	<p>Radar system that detects movement of individuals through walls.</p> <p>The interface is akin to a stud finder. Meaning that there is no identifiable or sensitive information. This only indicates whether or not there is a person in the vicinity.</p> <p>https://www.youtube.com/watch?v=tvrPT3tpjZY https://camero-tech.com/xaver-products/xaver-100/</p>		
Department	SPD	Case No.	4432

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/11/2023

Technology Description

Technology Name	Optics 1: ECOTI Enhanced Clip-On Thermal Imager		
Description	Night vision enhancement optic that projects a thermal overlay onto existing night vision goggles. The ECOTI is an add-on for night vision to enhance visibility in low-light or low-visibility conditions like fog - it is used by SWAT		
Department	SPD	Case No.	4442

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/11/2023

Technology Description

Technology Name	Digital Radiograph (DR) Panels X-Ray System		
Description	<p>This technology is a digital x-ray used to see inside a container, such as a backpack or a box, to verify if there is an explosive substance inside and if so, help to identify the substance.</p> <p>This device is used when there is a suspected explosive device in a container such as a backpack or box to determine if there is explosive material in the container.</p>		
Department	SPD	Case No.	4444

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/11/2023

Technology Description

Technology Name	Customer Service CIS Workflow Application (SPU and SCL)		
Description	We are purchasing the robotic software process application from NICE. The attachments describe the overall architecture and technical details related to security and privacy. RPA has already been implemented in the City via a competitor to NICE, Automation Anywhere. RPA is a technology that sits on top of existing City applications and automates mundane, error prone work processes that involve applications. The Customer Service CIS Workflow project will implement direct Customer Care and Billing enhancements and procure and implement an application which will reduce direct CIS user interactions with the multiple systems required to solve customer problems. The solutions will improve key high volume and high error rate workflows, reducing the number of keystrokes required, reducing the time to complete each workflow, reducing errors, reducing training time, and standardizing processes. This project is jointly funded by SCL and SPU.		
Department	SCL, SPU	Case No.	2704

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/13/2023

Technology Description

Technology Name	Wizdler Chrome Extension		
Description	<p>Our team works heavily on developing and testing web services. We are submitting Privacy Office Review of two Chrome extensions -- Wizdler and http mod – both are developer tools that TI-Integration engineering team used frequently, this review is for ModHeader, a Chrome extension to:</p> <ul style="list-style-type: none"> - Add, modify, and remove request and response headers. - Use ModHeader to set X-Forwarded-For, Authorization, Access-Control-Allow-Origin, Content-Security-Policy, and your custom headers! - Modify cookies in request / response header. - Advanced Content-Security-Policy editor - Redirect URL to another. - Enable header modification by URLs. - Advanced filtering by tab, tab group, or window <p>For privacy review:</p> <ul style="list-style-type: none"> - Our team is CJIS certified, and all completed privacy training. - Most of the data that is used by both tools are test data. - No customer information and/or privacy information is kept or persisted and obfuscated. 		
Department	ITD	Case No.	4453

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/21/2023

Technology Description

Technology Name	NVDA Screen Reading Software / Citywide		
Description	NVDA screen reader provides text-to-speech functionality for our online trainings. As an organization, we need to make the information we provide to employees accessible to employees. Some employees need help accessing the information for various reasons. Some have trouble seeing text on a screen: a NVDA screen reader can provide the accommodation and make the content accessible by reading the text on the screen to a user. We have accessibility standards to meet and the NVDA screen reader can help us meet them.		
Department	SPU	Case No.	4473

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

4/25/2023

Technology Description

Technology Name	FLIR Model LS-XR Compact Thermal Monocular		
Description	<p>This equipment will be used by the SWAT unit. It is used during low-light operations: ie smoke, fog.</p> <p>Handheld thermal imaging device. the device is only used in areas where the user already has a legal authority to be and does not enhance their ability to see into a location they wouldn't otherwise be able to access.</p> <p>This is a complement to night vision the differences are below: FLIRs make pictures from heat, not visible light. This results in better understanding of surroundings.</p> <p>Night Vision Goggles take in small amounts of visible light, magnify it greatly, and project that on a display.</p> <p>Due to misconceptions of how this type of technology works, there may be concern that there are impacts to civil liberties, however the device is only used in areas where the user already has a legal authority to be and does not enhance their ability to see into a location they wouldn't otherwise be able to access.</p>		
Department	SPD	Case No.	4443

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

No Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

No Technology that is used to collect data where individuals were presented with a clear

and conspicuous opt-out notice.

No	Technologies used for everyday office use.
No	Body-worn cameras.
No	Cameras installed in or on a police vehicle.
No	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
No	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
No	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

No	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
No	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
Yes	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

5/10/2023

Technology Description

Technology Name	StarChase		
Description	<p>The StarChase system is a police pursuit management technology that contains a miniature GPS tag and compressed-air launcher which can be a handheld unit or mounted into a police vehicle.</p> <p>The GPS tracker attaches to vehicles and allows tracking of vehicle location while limiting the need to pursue. GPS coordinates of the fleeing vehicle are relayed through wireless phone networks and displays location, suspect speed, and other pertinent data are viewed via the secure web-based interface.</p> <p>All of the tracking data can be downloaded from the web portal and used as evidence in a court of law.</p> <p>The projectile conforms to NIJ less-than-lethal standards.</p>		
Department	SPD	Case No.	4492

Criteria

Does the technology meet the definition a Surveillance Technology?

Yes Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

No Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

No Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

No Technologies used for everyday office use.

No Body-worn cameras.

No Cameras installed in or on a police vehicle.

No	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
No	Cameras installed on City property solely for security purposes.
No	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
No	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

No	The technology disparately impacts disadvantaged groups.
No	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
No	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
Yes	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

The technology will require a Surveillance Impact Report. The project technology meets the definition, does not fall under any exclusion criteria, and meets at least one inclusion criteria. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

5/11/2023

Technology Description

Technology Name	Skagit Quick Books Replacement		
Description	<p>QuickBooks and QuickBooks POS at Skagit Store; Gorge Inn need to be replaced. The software will cease to operate after October 3, 2023.</p> <p>The POS system supports 2 cash registers at Skagit Store and 1 cash register at the Gorge Inn. After many years of searching, we have selected ITRetail's SAAS solution. IT Retail was designed to support small grocery stores. It supports Customer Accounts for Employee purchases and Payroll Deductions and handles "store cards" that will be used for charges to workorders.</p> <p>Note There are no internet sales transactions. All credit cards are used on site and are entered through pin pads/credit card readers at cash registers. Treasury has granted an exception, that has also been approved by Wells Fargo, to exempt standard city credit card processing by Kubra. The exemption was based on functionality (employee accounts); the enhanced security of P2PE processing. P2PE = Point to Point Encryption</p>

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

5/18/2023

Technology Description

Technology Name	Polls for Microsoft Teams		
Description	Allows for individuals to conduct polls within MS Team meetings.		
Department	ITD	Case No.	4505

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
------------	----------------------------------------------------------

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

5/18/2023

Technology Description

Technology Name	Power Automate for Teams		
Description	Allows users to create automated flows within MS Teams.		
Department	ITD	Case No.	4516

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A Technologies used for everyday office use.

N/A Body-worn cameras.

N/A Cameras installed in or on a police vehicle.

N/A Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

N/A Cameras installed on City property solely for security purposes.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/1/2023

Technology Description

Technology Name	Azure App		
Description	SPD is using Jira/Confluence for project management. Instead of storing data on their cloud, they would like to store/keep data in the SPD SPO site. To enable the integration, two apps from Atlassian Marketplace need to be allowed access to one SPD site.		
Department	SPD	Case No.	4556

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/6/2023

Technology Description

Technology Name	CueiT software from CueScript		
Description	Seattle Channel is looking to purchase a new teleprompter system which uses CueiT software from CueScript. This will replace existing software Autoscript from Vitec. See attached quote for details.		
Department	ITD	Case No.	4554

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

Surveillance Technology Criteria Review

6/9/2023

Technology Description

Technology Name	CaseIQ (formerly I-Sight)		
Description	Case IQ is a configurable case management platform used by organizations to help them track, manage, and report on a wide range of business processes including case reporting. The Office of the Employee Ombud (OEO) provides City of Seattle Employees with voluntary, informal, neutral, confidential, third-party assistance in managing interpersonal issues, concerns, or conflicts in a non-escalating manner. City of Seattle Employees can report their concerns through Case IQ web portal. This portal will be a secure and confidential way to report and seek an appointment with our staff. Our staff will use Case IQ workflow technology from case intake to case closure to record, track status, and manage data within one centralized solution. We can also collect, retrieve, and pull data though the system for creating our annual reports.		
Department	All City of Seattle	Case No.	4543

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	SCL Distribution Line Sensor		
Description	<p>Distribution line sensors are remote communication devices that Seattle City Light will use to monitor line current and temperature, send alarms to System Control Center dispatchers in the case of faults, and flash an LED to help guide repair crews to the source of the fault.</p> <p>They are an updated version of the existing fault current indicators, which are non-communicating devices that only flash an LED to direct repairs crews to the location of the fault. When a fault occurs, line sensors enable dispatchers to identify which sensors see the fault and to inform repair crews of the likely location of that fault.</p> <p>Line sensor data will be viewable by dispatchers using their energy management system (EMS) displays. Data will be routed from the Landis+Gyr network operations center back to the System Control Center, where it will be stored on a dedicated server from which the EMS can retrieve the data.</p>		
Department	SCL	Case No.	4434

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A Technologies used for everyday office use.

N/A Body-worn cameras.

N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	Submittable for DEEL Grants Submission		
Description	Submittable is a grant management platform. It will allow DEEL to generate and post RFI/P/Qs and allow the public to complete and submit applications. This software will also allow DEEL to recruit internal and external (to the City) review panelists to score grant submissions.		
Department	DOE	Case No.	4446

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	Mobile App: EAM Connect		
Description	Automates the full lifecycle of physical business assets with prescriptive workflows. Mobile application for the AMWO (Asset Management/Work Order) software used by SPR/PKS		
Department	PKS	Case No.	4467

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	Cyara Velocity		
Description	<p>The Cyara Velocity application will allow the Contact Center project test team to automate a majority of end-to-end functional and regression testing such as IVR testing that intelligently listens, logs, and documents every test step and the results, transcribing and recording the inputs and messages played, and can then automatically transform the test calls into reusable test cases. Agent desktop configurations and other contact center features and functionality testing are also automated saving an enormous amount of time that would normally be spent on manual testing.</p> <p>Useful general info:</p> <p>The purpose of functional testing is to determine how closely the developed application matches the desired requirements. Whereas, the purpose of regression testing is to check that any change in the application or systems have not led to code break and the system works fine.</p>		
Department	ITD	Case No.	4469

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	ICOR Tech Mini Robot		
Description	<p>The ICOR Mini-123 is a lightweight, portable robot operated by a single SPD from a handheld control unit from a safe position nearby. Designed for rapid tactical missions, the robot is simple to operate and quick to deploy for searching rooms, hallways, stairwells and confined spaces. With rubber tracks and articulating front and rear flippers, the Mini-123 effortlessly climbs stairs. It also includes an extendible rotating claw arm, camera, and 2-way communication.</p> <p>The functionality of this ROV is included in the Council approved Remotely Operated Vehicles (ROVs) SIR.</p>		
Department	SPD	Case No.	4582

Criteria

Does the technology meet the definition a Surveillance Technology?

Yes Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

No	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
No	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
No	Technologies used for everyday office use.
No	Body-worn cameras.
No	Cameras installed in or on a police vehicle.
No	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
No	Cameras installed on City property solely for security purposes.

No Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

No Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

No The technology disparately impacts disadvantaged groups.

No There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

No The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

Yes The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

The technology will require a Surveillance Impact Report. The project technology meets the definition, does not fall under any exclusion criteria, and meets at least one inclusion criteria. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	Hawkin Dynamics Force Plates		
Description	<p>This technology is used for City employees- specifically for new hires.</p> <p>Description: Hawkin Dynamics is a wireless force plate system & cloud-based software. This system is often used by exercise scientists to accurately and objectively assess physical readiness, to screen for injury potential, and as a monitor progress when rehabilitating injuries. This product operates as a set of two platforms (left and right). Together they detect load and force production both unilaterally and bilaterally.</p>		
Department	SFD	Case No.	4575

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

6/29/2023

Technology Description

Technology Name	Seattle Channel Remotely Piloted Aircraft System (RPAS)		
Description	<p>RPAS (Remotely-Piloted Aircraft System, also known as UAS - Unmanned Aircraft System) — An aircraft and its associated elements required for the safe and efficient use, operated without the possibility of direct human intervention from within or on the aircraft. A RPAS is capable of sustaining directed flight whether preprogrammed or remotely controlled. For the purposes of this document, RPAS for the City of Seattle are “small, unmanned aircraft” defined by the FAA. Unless otherwise specified or authorized, any RPAS utilized will weigh less than 55 pounds on takeoff, including everything on board or otherwise attached to the aircraft in conformance with the legal definition of “small, unmanned aircraft.”</p> <p>The City of Seattle will operate RPAS for the collection of aerial photography, videography according to procedures set by City of Seattle and within the legal boundaries set by existing laws, regulations, and FAA requirements.</p>		
Department	ITD	Case No.	4021

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.
